THINK GREEN®

Dear Neighbors,

It's hard to believe it's already March. We hope your new year got off to a great start. At Williamson County Landfill, it's been business as usual. In February, we attended the Hutto Chamber Gala to celebrate the success of local businesses in Hutto. We also completed the construction of a new cell on the property and had a visit from students at Legacy Early High School.

I would also like to remind everyone that first Hazardous Household Waste (HHW) collection event of the year is coming soon. The event will be March 25, 2017 at the Gupton Stadium parking lot. This is a great opportunity for residents to clean out their garages and storage sheds. For more details, and a list of acceptable items, visit [williamsoncountylandfill.wm.com](http://williamsoncountylandfill.wm.com).

Last but not least, I would like to remind residents that there are many great, local events happening this Spring. Visit [visithutto.com](http://visithutto.com) for more information.

As always, if you have any questions or concerns, don't hesitate to call me.

## Legacy Early College High School Visits Williamson County Landfill and Hutto Recycling Center

In March, Environmental Science AP students from the Legacy Early College High School in Taylor, Texas visited the landfill and recycling center to learn what happens at both facilities. At the landfill, students learned about the anatomy and life of a landfill and landfill equipment. At the Hutto Recycling Center, students were able to see how e-waste and other recyclables are collected and processed through the facility.

All in all, the students and teachers had a great time learning about what happens at a Waste Management facility.
